

Note for Patrick:

- see also horizontal version (which I think is probably better).
- Size / aspect ratio is VERY easy to change, since this is just a bunch of rectangles.
- Not sure whether price/haz/heath labels should go on top/bottom... but I like other version better anyway, unless spacing constraints make it impossible.

Little infographic to go along: (background color is similar to colorbars)

PRICE SHOCKS

19% of households in 2014

- includes price increases, price falls, and input increases
- worst in the southeast

HEALTH SHOCKS

10% of households in 2014

- includes major illnesses and death of the household head
- <<other interesting fact>>

HAZARD SHOCKS

9% of households in 2014

- includes droughts, floods, landslides, and fires
- highly variable between years

Household shocks per region, 2014
