

DRAFT: Not for distribution

Feed the Future (FtF) is targeting some of the most vulnerable population in the Zones of Influence (ZOI).

Comparing the households near FtF ZOI and outside them in 2012, there are significant differences:

What's higher

- Food insecurity
worries about having food, lack of food in house
- children under the age of 5
- vulnerability to price shocks
- tropical livestock holdings
- mud homes
- treatment of drinking water
- Muslims and non-Christian household heads

What's lower

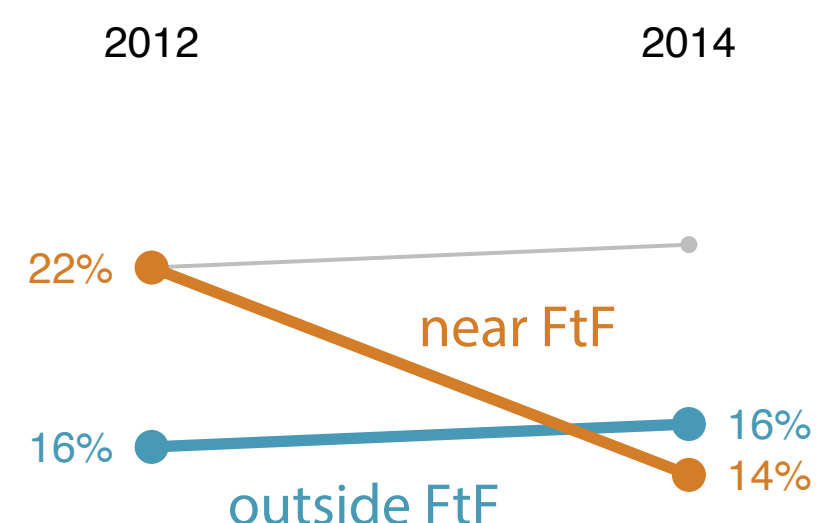

- wealth
asset holdings
- durable good holdings
mobile phone, phone, tv, sofa, stove
- means of transportation
bicycles, cars, motorcycles
- flush toilets

Between 2012 and 2014, households near Feed the Future Zones of Influence see significant improvements in food security perceptions and illness shocks relative to households outside them.

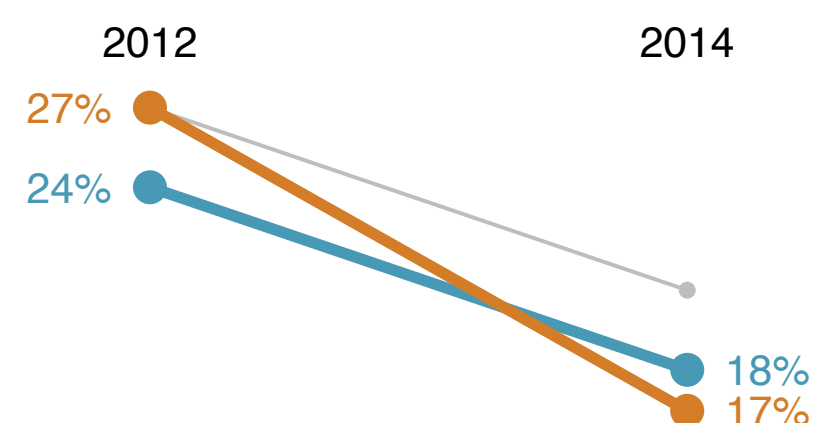

FOOD SECURITY PERCEPTIONS

ILLNESS SHOCKS

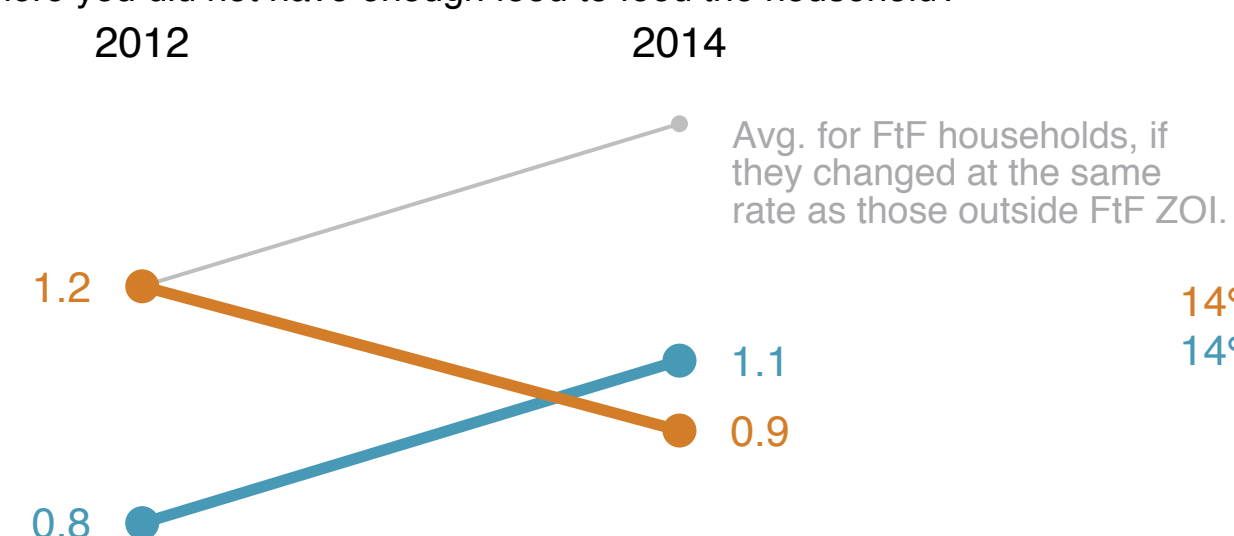

Did you worry you would not have enough food?

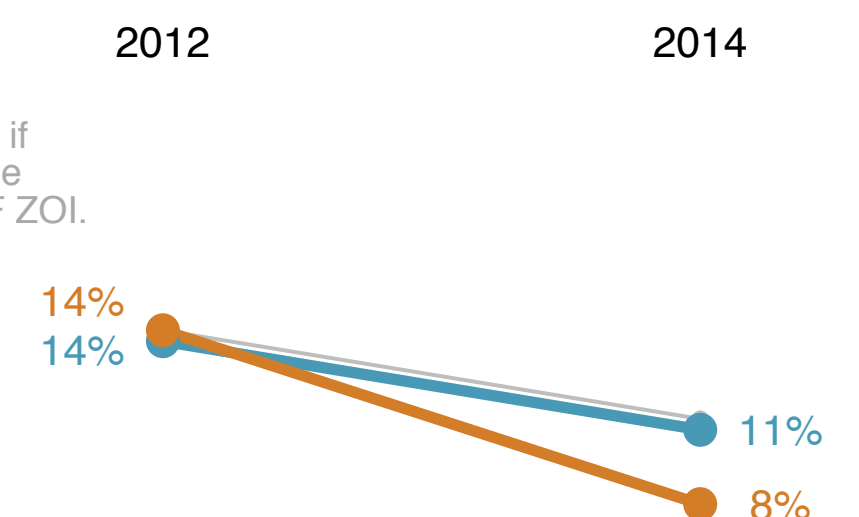

Did you rely on less preferred foods?

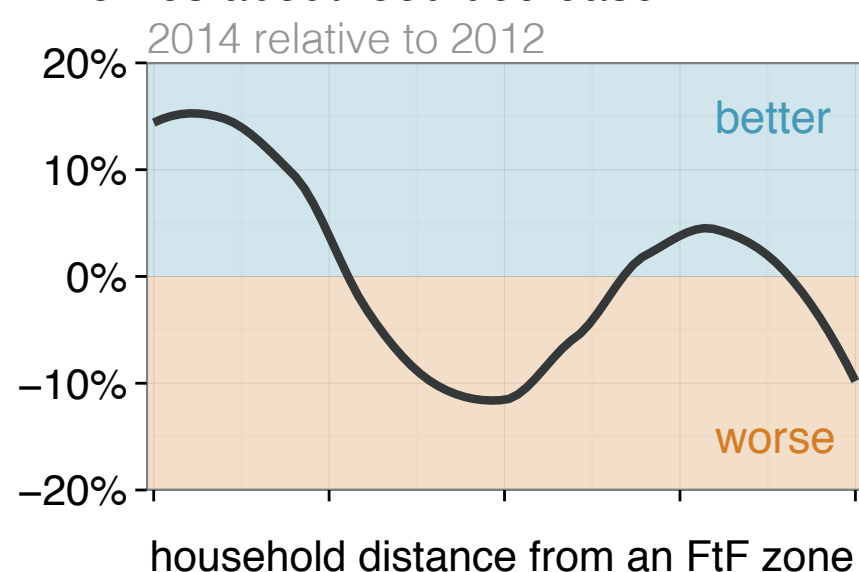

How many months in the past year did you have a situation where you did not have enough food to feed the household?

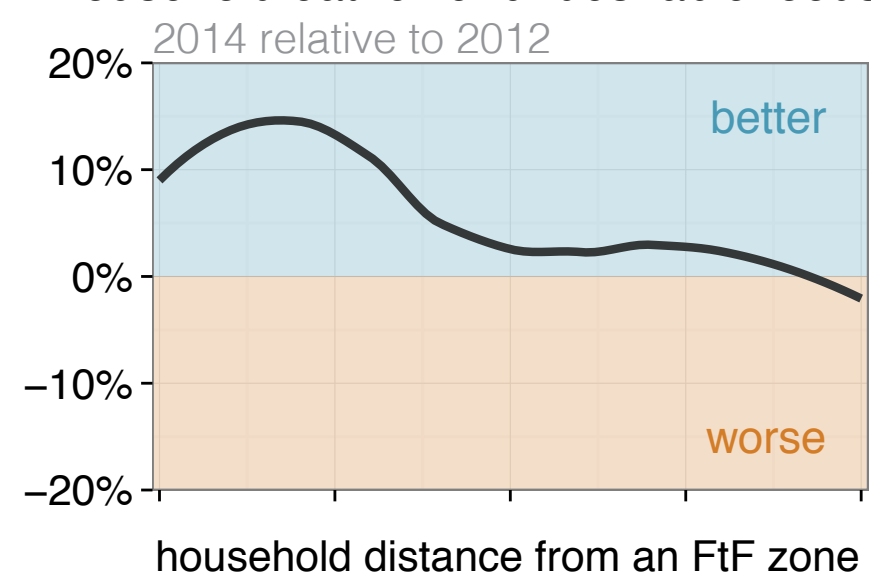

Did anyone in your household have a major illness in the past year?

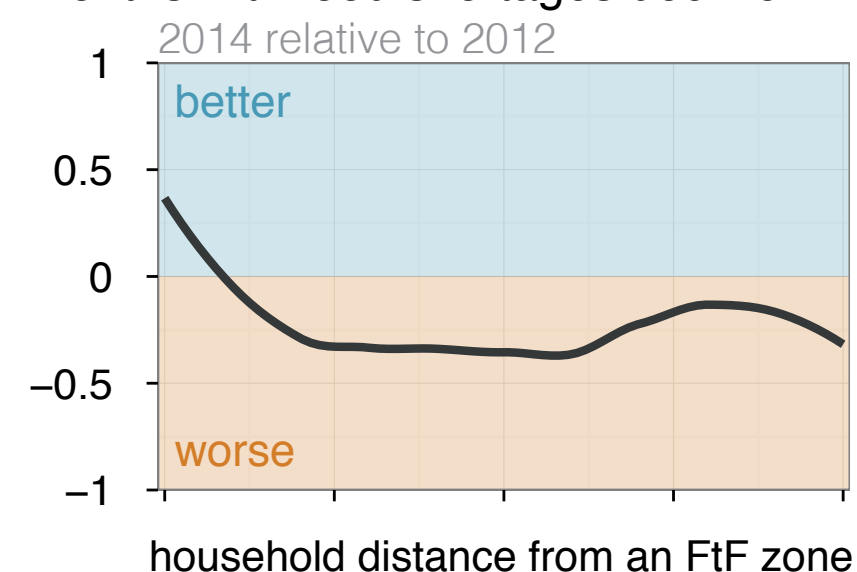

Worries about food decrease

Household eat fewer undesirable foods

Months with food shortages decline

Death and disease decrease
